Number Game: Reach 20 to Win!
enter the next 1, 2, or 3 numbers in sequence: 1
Computer played: [2, 3]
enter the next 1, 2, or 3 numbers in sequence: 4 5
Computer played: [6, 7]
enter the next 1, 2, or 3 numbers in sequence: 8 9
Computer played: [10, 11]
enter the next 1, 2, or 3 numbers in sequence: 12 13
Computer played: [14, 15]
enter the next 1, 2, or 3 numbers in sequence: 16 17
Computer played: [18, 19]
enter the next 1, 2, or 3 numbers in sequence: 20
Player Wins!!!
```

```
[3]: #Develop a function called ncr(n,r) which computes r-combinations of n-distinct
      ↪object .
      #use this function to print pascal triangle, where number of rows is the input.
import math

def ncr(n, r):
    return math.comb(n, r) # Alternatively: math.factorial(n) // (math.
      ↪factorial(r) * math.factorial(n - r))

def print_pascals_triangle(rows):
    for n in range(rows):
        row = []
        for r in range(n + 1):
            row.append(ncr(n, r))
        print(" " * (rows - n), " ".join(map(str, row)))

# Example usage:
num_rows = int(input("Enter the number of rows: "))
print_pascals_triangle(num_rows)
```

```
Enter the number of rows: 5
 1
1 1
1 2 1
1 3 3 1
1 4 6 4 1
```

```
[4]: #Read a list of n numbers during runtime. Write a Python program to print the
      ↪repeated elements with frequency count in a list.
```

```

# Read a list of numbers from the user (example input: "2 1 2 3 4 5 1 3 6 2 3
↪4")
numbers = list(map(int, input("Enter numbers separated by spaces: ").split()))
frequency_count = {}
for num in numbers:
    if num in frequency_count:
        frequency_count[num] += 1
    else:
        frequency_count[num] = 1
print("Output:")
for number, count in frequency_count.items():
    print(f"Element {number} has come {count} times")

```

Enter numbers separated by spaces: 1 2 3 2 3 2 4 5 6 4 5 7 2 3 5 7 9

Output:

```

Element 1 has come 1 times
Element 2 has come 4 times
Element 3 has come 3 times
Element 4 has come 2 times
Element 5 has come 3 times
Element 6 has come 1 times
Element 7 has come 2 times
Element 9 has come 1 times

```
